

Association of Analytical Communities Sub-Saharan Africa Section
Inaugural Meeting

Improving the Quality of Testing to assure Food Safety, Public Health and Trade

5-7 November 2018

The Farm Inn Hotel & Conference Centre
Pretoria, South Africa

The AOAC INTERNATIONAL Sub-Saharan Africa Section is a Regional Professional Scientific Association whose primary goal is building confidence in analytical results.

The Section is dedicated to promoting and advancing the knowledge and best practices in the analytical sciences' in our Region.

This Section aims to achieve its goals through collaboration, training & education, analytical methods development & harmonisation, the extension of the scope of Official Methods (*to include indigenous foods where required*) and to serve as an independent and impartial scientific advisory body, while engaging laboratory support services providers to develop the infrastructure necessary to ensure easy access to reagents, consumables, instrumentation and maintenance, all of which are required to sustain testing performance standards.

For more information on the conference, sponsorship & exhibition opportunities or to register, contact us at:
